DETAILED ACTION

Receipt is acknowledged of the amendment and terminal disclaimer filed July 9, 2002. Claims 1, 21, 55, 56, 70-75, 77, 79 and 80 have been amended. Claims 10, 22, 26-29, 31, 32, 34-49, 52-54 and 85 are withdrawn as directed to a non-elected invention.

Specification

Based on Applicant's remarks and a further review of the instant specification the objection to incorporation by reference of G. Fonnum, J. Bakke and Fk. Hansen – Colloid polym. Sci. 271, 380-389 (1993) is withdrawn.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 1617

Claims 1-9, 11-21, 23-25, 30, 33, 50, 51 and 55-84 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 5,925,341 (341) in combination with WO 99/36047 (047).

This rejection is maintained for reasons of record in the Office Action mailed April 10, 2002, paper no. 7.

Claim Objections

In view of Applicant's remarks and upon further review of the claims, the notice that claims 70-74, 77, 78, 80 and 81 would be objected to upon allowance of claims 1, 2, 75 and 76 as substantial duplicates has been withdrawn.

Response to Arguments

Applicant's arguments filed July 9, 2002 have been fully considered but they are not persuasive.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, the motivation to combine the references comes from the teaching of US '341 that the compositions can contain thickeners and the teaching of WO '047 that polyether-polyurethane polymers are thickeners.

Art Unit: 1617

It is *prima facie* obvious to combine two compositions each of which is taught by the prior art to be useful for the same purpose, in order to form a third composition which is to be used for the very same purpose. *In re Kerkhoven*, 626 F.2d 846, 850, 205 USPQ 1069, 1072 (CCPA 1980). The idea of combining them flows logically from their having been individually taught in the prior art. *In re Crockett*, 279 F.2d 274, 276-77, 126 USPQ 186, 188 (CCPA 1960). Both references are directed to the same field of endeavor, cosmetics, and are solving the same problem, providing conditioning effects to hair.

In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971). In the instant case, the conclusion of obviousness comes from the teachings of the prior art as stated above.

Applicant argues that one of ordinary skill in the art would not expect that using polyether-polyurethane copolymers would product stable and transparent emulsion, i.e. turbidity. Applicant has not provided any evidence of record to show unexpected results over the prior art. The combination of the prior art teachings results in a composition containing the same components instantly claimed. One of ordinary skill in the art would

Art Unit: 1617

expect a composition containing the same components to exhibit the same properties, i.e. turbidity, absent evidence to the contrary.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
